

Practice Labs 2018 Roadmap

23 January 2018

Introduction

Based on research and feedback from our partners we have identified the most popular courses being developed this year. Using this information we have produced a roadmap which details the labs we will be developing for 2018.

We have endeavoured to include as many titles as possible however, our criteria requires that two or more partners must be developing the same title in order for us to develop a lab.

In special circumstances, for example where there are business opportunities, we may consider developing a lab outside our set criteria.
